2026-27

Winter Extracurricular Catalog

High School - Heights Campus

The French American Academy

Bilingual Education, International Citizens

INFORMATION ABOUT OUR PROGRAMMING

Enrichment & Clubs

The FAA is proud to present curated extracurricular programming seasonally throughout the year. Your selections using the google form are final, please review the enrichment policy page at the end of the google form before submitting. High School clubs and enrichment costs are included within school fees (with Aerospace Lab as the only exception). All enrichment programs are seasonal with the exception of Basketball. Acceptance into Basketball will be based upon availability and coach discretion.

Winter Enrichment Details

Season Dates:
Dec 14 - March 18

School Closure Dates:
Dec 21-31, Jan 18, Feb 15-19

Registration Deadline:
Dec 3 *(Late Fee applied to enrollment past December 3rd)*

Time: 3:50-4:50PM

Confirmation/Waitlist: Your selection is confirmed once the google form has been submitted. If you have been placed on a waitlist for one or more of your selections you will be contacted directly. If a class has been cancelled due to low enrollment you will be contacted directly.

Winter Enrichment

Basketball

Refund Policy: There will be no full refund nor credits once a class is charged on your portal.
In case of a child's absence due to medical, school trip, or any other reason there will be no credit applied as classes MUST run due to a mix of grades in each enrichment class.

NEW

Join Our Tuesday Peer-Tutoring Club! (FREE)

Every Tuesday after school, our Peer-Tutoring Club brings students together to learn from one another. Older students will support younger students with homework, reading, math, and other subjects, offering the kind of encouragement and understanding that only a fellow student can give. We'll do our best to pair students based on their strengths, so every match is a good fit. Younger students gain confidence and extra help, while older students build leadership and communication skills and get community service hours. Because this is an important responsibility, older students who wish to become tutors will need to apply to be selected. Whether you're looking for support or ready to lend a hand, we'd love to see you there!

This offering will be confirmed based on enrollment by December 3rd.

MONDAY- LUNDI

Competition Math Club

Unlock your inner problem-solver! If you enjoy puzzles, logic games, and testing your skills on a global stage, this is the club for you!
This year, we are bridging the best of French and American mathematical challenges. Whether you love the fast-paced logic of the Concours Kangourou and Castor, the rapid-fire excitement of the Course aux nombres, or the prestigious puzzles of the AMC 8 and the French Olympiades, there is a challenge here for you.
No matter your goals, this club is shaped by your interests. Come explore, problem-solve, and discover just how far math can take you!

Libérez le mathématicien qui sommeille en vous ! Si vous aimez les casse-têtes, les jeux de logique et relever des défis à l'échelle internationale, ce club est fait pour vous ! Cette année, nous réunissons le meilleur des défis mathématiques français et américains. Que vous soyez passionné par la logique du Concours Kangourou et du Concours Castor, par le rythme soutenu de la Course aux nombres, ou par les défis prestigieux de l'AMC 8 et des Olympiades françaises de mathématiques, vous trouverez ici un défi à votre mesure. Quels que soient vos objectifs, ce club s'adapte à vos intérêts. Venez explorer, résoudre des problèmes et découvrir jusqu'où les mathématiques peuvent vous mener !

Min/Max Students: 6/20

Afterschool Enrichment
TUESDAY- MARDI

Aerospace Engineering Lab

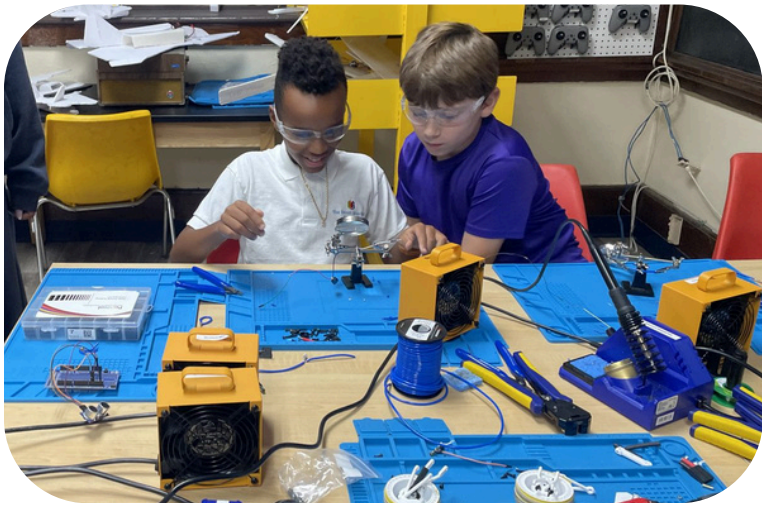

Students learn how aircraft fly by designing, building and flight testing their own. First-time students start with the fundamentals, from paper gliders to foam airplanes. Returning students build on what they learned last semester and take on more advanced designs.

Skills students build:

1. **Physics of Flight:** Discover how lift, drag, thrust and weight work by testing and improving their own gliders
2. **Aircraft Design:** Sketch, build and refine their own aircraft, from paper gliders to foam RC airplanes
3. **3D Design & Printing:** Design custom aircraft parts in CAD software and print them on our 3D printer
4. **Electronics:** Install the motors, batteries and servos that turn an airframe into an RC airplane
5. **Testing & Teamwork:** Flight test, troubleshoot and improve their aircraft in small teams

What students leave with:

A working understanding of how aircraft are designed, built and flown, a portfolio of their own designs and builds, and the foundation to continue into our Cadet Program and the full Flight & Aerospace Academy pathway.
Families are invited to a Demo Day at the final session, where teams present and fly the aircraft they built.

FLIGHT & AEROSPACE ACADEMY

TUESDAY- MARDI

Quiz Bowl Club

Challenge your mind and experience the excitement of academic competition! Quiz Bowl is a fast-paced team activity where students use buzzers to answer questions about history, science, literature, math, geography, the arts, and more. Through weekly practices, students will build critical thinking, teamwork, and quick-recall skills while exploring a variety of subjects. Middle and high school students will practice together but compete on separate age-based teams, with the goal of representing FAA at local tournaments and eventually advancing to regional and national competitions. A minimum of four students is needed to form each team.

Développez votre esprit et découvrez l'excitation des compétitions académiques ! Le Quiz Bowl est une activité d'équipe dynamique où les élèves utilisent des buzzers pour répondre à des questions sur l'histoire, les sciences, la littérature, les mathématiques, la géographie, les arts et bien plus encore. Grâce à des entraînements hebdomadaires, les élèves développeront leur esprit critique, leur esprit d'équipe et leur rapidité de réflexion tout en explorant une grande variété de sujets. Les élèves du collège et du lycée s'entraîneront ensemble, mais participeront aux compétitions dans des équipes distinctes selon leur niveau scolaire. L'objectif est de représenter la FAA lors de tournois locaux, avec l'ambition de participer à terme à des compétitions régionales et nationales. Un minimum de quatre élèves est requis pour former chaque équipe.

Afterschool Enrichment
WEDNESDAY - MERCREDI

Jam Band

Jam Band is for students who have some instrumental or vocal background at any level. In the spirit of musicians gathering to "jam" with each other, we will form groups and work on songs together from a variety of genres determined by student interest and teacher recommendation. Students will practice arranging, improvising over chord structures, writing their own songs, or any combination of the above. Ideally, students will bring their own instruments, but there may be solutions found if other instruments or equipment are needed. This enrichment opportunity is a chance to create, collaborate, and learn about different styles of music in a fun environment. Performance opportunities will be sought out for students as desired, but mainly this is about making music for music's sake.

« Jam Band » s'adresse aux élèves possédant une certaine expérience, instrumentale ou vocale, quel que soit leur niveau. Dans l'esprit des rencontres musicales informelles — les « jams » —, nous formerons des groupes pour travailler ensemble sur des morceaux issus de genres variés, choisis en fonction des intérêts des élèves et des recommandations de l'enseignant. Les participants pourront s'exercer à l'arrangement, à l'improvisation sur des structures harmoniques, à la composition de leurs propres chansons, ou à toute combinaison de ces activités. Il est préférable que les élèves apportent leur propre instrument, mais des solutions pourront être trouvées si d'autres instruments ou équipements s'avèrent nécessaires. Cette activité d'enrichissement est une occasion de créer, de collaborer et de découvrir différents styles musicaux dans un cadre ludique. Des opportunités de représentation pourront être proposées aux élèves qui le souhaitent, mais l'objectif premier reste avant tout le plaisir de faire de la musique.

Afterschool Club
WEDNESDAY-MERCREDI

Math Support

Designed for high school students seeking extra guidance, this support group provides individualized help with current coursework, homework, and test preparation. Students will strengthen their understanding of key mathematical concepts, build problem-solving strategies, and gain confidence in a collaborative, supportive environment.

Conçu pour les élèves du lycée souhaitant bénéficier d'un accompagnement supplémentaire, ce groupe de soutien offre une aide personnalisée pour les devoirs, les notions étudiées en classe et la préparation aux évaluations. Les élèves renforceront leur compréhension des concepts mathématiques, développeront leurs stratégies de résolution de problèmes et gagneront en confiance dans un environnement collaboratif et bienveillant.

Afterschool Club
THURSDAY- JEUDI

Student Leadership & Service

The Student Leadership & Service Club offers students the opportunity to earn community service hours while gaining hands-on experience in leadership, organization, design, and communications. Students will work alongside the extracurricular director to support after-school programming through projects such as organizing materials, developing enrichment ideas, designing flyers using Canva, creating activities for younger students, and producing a monthly student newsletter. Members will build practical skills in teamwork, creativity, project planning, and communication while making a meaningful contribution to the school community.

Le Club de leadership et de service communautaire offre aux élèves l'occasion d'effectuer des heures de bénévolat tout en acquérant une expérience pratique en leadership, en organisation, en design et en communication. Les élèves travailleront aux côtés de la directrice des activités parascolaires afin de soutenir les programmes après l'école à travers différents projets : organiser du matériel, proposer de nouvelles activités, créer des affiches sur Canva, concevoir des activités pour les plus jeunes et réaliser une infolettre mensuelle destinée aux élèves. Les membres développeront des compétences en travail d'équipe, en créativité, en planification de projets et en communication, tout en contribuant activement à la vie de leur école.
